

COURT MANAGEMENT SERVICES

The Courts of Jamaica

Operational Plan
2015 - 2016

(Revised February 2014)

1. Introduction

1.1 Vision

The vision of the Court Management Services is:

“To become world leaders in court administration”

1.2 Mission and/or Mandate

The mission of the Court Management Services is:

“To provide efficient and effective administrative services to the courts of Jamaica using the most innovative methods thus contributing to an improved justice system”

1.3 Overview of the Courts

The Court Management Services (CMS) was established in 2010 to improve service delivery in the Courts and to ‘enable the Judiciary and the Courts to have greater input in budgetary decisions and in the execution of activities surrounding the operations of the Courts and to further strengthen judicial independence’.

The CMS is mandated to perform a range of Court-related administrative services which includes the following functions: Finance and Accounts; Human Resource Management and Administration; Information and Communication Technology; Communication and Client Services; Property and Facilities Management; and Internal Audit. These administrative services are provided to the fifty-six (56) courts which include: The Court of Appeal, The Supreme Court, Resident Magistrates’ Courts and Outstations island-wide.

These priorities of the Courts are represented in five (5) categories:

- 1. Strengthening the Judiciary and support workforce***
- 2. Establishing a sound Court infrastructure***
- 3. Ensuring fair and timely case resolution***
- 4. Strengthening public trust and confidence***
- 5. Providing efficient and effective administrative services to the courts***

This Operation Plan highlights the major programmes/ initiatives to be undertaken for the Financial Year 2015/2016 in order to achieve the strategic objectives and by extension, the priorities of the courts:

1. Providing adequate judicial support staff for the effective and efficient functioning of the judiciary;
2. Improving the physical infrastructure, aesthetics and profile of the Courts;
3. Providing efficient systems for information, communication and technology across all courts to improve overall efficiency;
4. Supporting the reduction of the backlog of civil and criminal cases in the Supreme Court and Resident Magistrate Courts;
5. Improving service standards provided to Court users; and
6. Strengthening governance and accountability in the administration of the Courts.

It is important to note that funding is a critical resource for the achievement of the targets stated in the plan and invariably the successful implementation will be hinged on the provision of funding to execute the programmes outlined here in.
